

Hook & Loop Ties

Applications

These reusable hook & loop ties are ideal for securing bundles of data cable in residential or commercial environments.

Description / Specifications

Available in three lengths, these reusable hook & loop ties offer a convenient nonpermanent cable management solution. Unlike nylon zip ties these hook and loop ties resist overtightening on category cables which can affect electrical performance. These cable management ties are composed of a hook style on one side and a loop style on the other for the tie to attach to itself for a secure closure, enabling your installation to maintain a professional and tidy appearance.

Features & Benefits

- Affordable cable management solution
- Reusable hook & loop style for nonpermanent solutions- can be used up to 100 times while still maintaining tension on cable bundles
- Ideal for data cables because unlike nylon zip ties these hook & loop ties resist overtightening on category cables which can affect electrical performance
- Stress free self attaching design
- Installation Temperature: 0°F (-18°C) to 219°F (104°C)
- Operating Temperature: 0°F (-18°C) to 219°F (104°C)
- Minimum Bundle Diameter: 0.25" (6.4 mm)
- Minimum Loop Tensile Strength: 40 lb. (177.92 N)
- Available in 6 inch, 8 inch, or 12 inch length
- Packaged in Bags of 10

Standards Compliance

- RoHS Compliant

Ordering Information

Description	Hook & Loop Ties - Black
Packaging	Bag of 10
Length	Item Number
6" (150 mm)	XACCM-00541
8" (200 mm)	XACCM-00852
12" (304 mm)	XACCM-00853
